SIMPLE AND EFFICIENT TRAVEL AND EXPENSE MANAGEMENT WITH SAP CONCUR

EFFICIENT PROJECT MANAGEMENT: 4 PHASES TO GO LIVE

We focus on intensive consulting and transparency in our project work:

Phase 1: Kickoff

We start the kickoff with a pre-configured, customized system. Based on our requirements analysis, you are able to make profound decisions.

Phase 2: Efficient implementation

You get continuous insights into your SAP Concur system and have an influence on the configuration right from the start.

Phase 3: Testing

You will receive a test matrix tailored to your system, which includes all the necessary test cases.

Phase 4: Go live

We support the implementation of SAP Concur in your company, from the kickoff to the employee trainings. In addition to the go live, we offer you longterm Service Level Agreements (SLAs).

ADDONS FOR YOUR SAP CONCUR SYSTEM

rocon cloud: data protection compliant & secure

Our addons are subject to strict IT security regulations and are audited regularly. They comply with the EU General Data Protection Regulation (GDPR) and the relevant ISO standards (DIN ISO 27001, DIN ISO 27002, DIN ISO 27017, DIN ISO 27018).

MISTRAL: Your flexible middleware

With our universal middleware MISTRAL, we can easily integrate SAP Concur into your unique IT environment. MISTRAL is highly flexible so that you can connect any ERP or HR system as well as other systems to SAP Concur. For example, you can automate the transfer of the employee data to SAP Concur via ETL and standardize your data management. You easily speed up the processes in the travel and expense management and avoid media discontinuities.

MISTRAL - ITA: Individual travel allowance for individual expenses

ITA maps all individual expenses in SAP Concur, for example Austrian Collective Labour Agreements. This addon features an intuitive user interface. Your employees can easily retrieve useful additional information and thus submit their expense claims quickly and accurately.

MISTRAL - TRAX: Your receipt images filter and extractor

MISTRAL - TREX (Transfer Receipt Extractor) enables you to flexibly select and extract receipts in SAP Concur according to the country, the period and the expense type. With just a few clicks you can save the data you need. This way, you master e.g. audits in no time.
